

## STEGOSAURUS with Tark and Vega

Command Module Gun Tips (4)

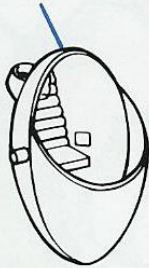

Laser Cannon Cluster (2)

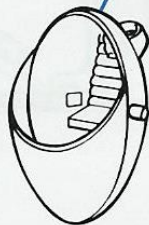

Swivels (2)

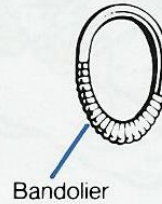

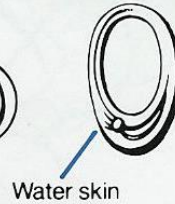

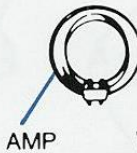

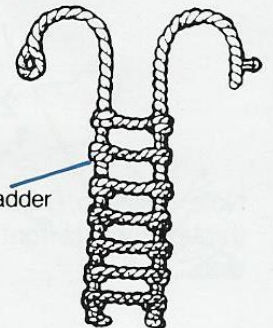

Right Command Module

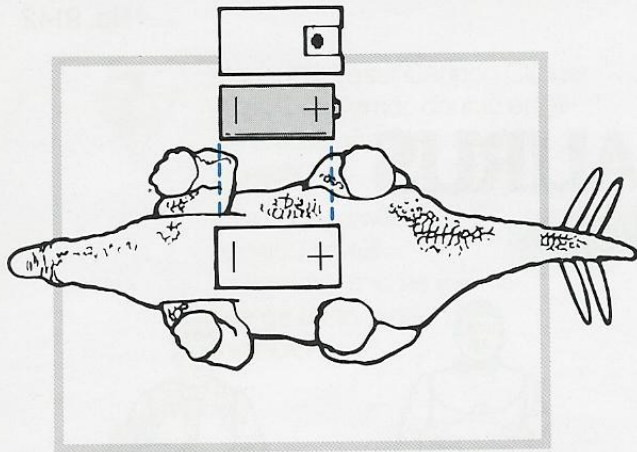

Left Command Module

Long Range Missiles (3)

Accessories may be attached to parts tree. Note: One "C" size battery is required.

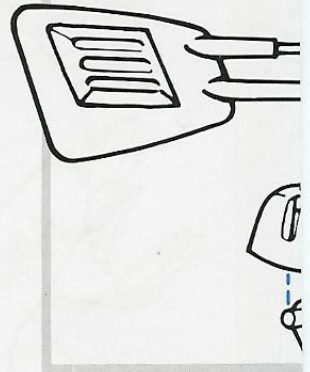

**1**

Open the battery door on the underside of the Stegosaurus (by sliding the latch forward and lifting) and install one C-size battery. Replace the battery door and slide the latch shut.

**2**

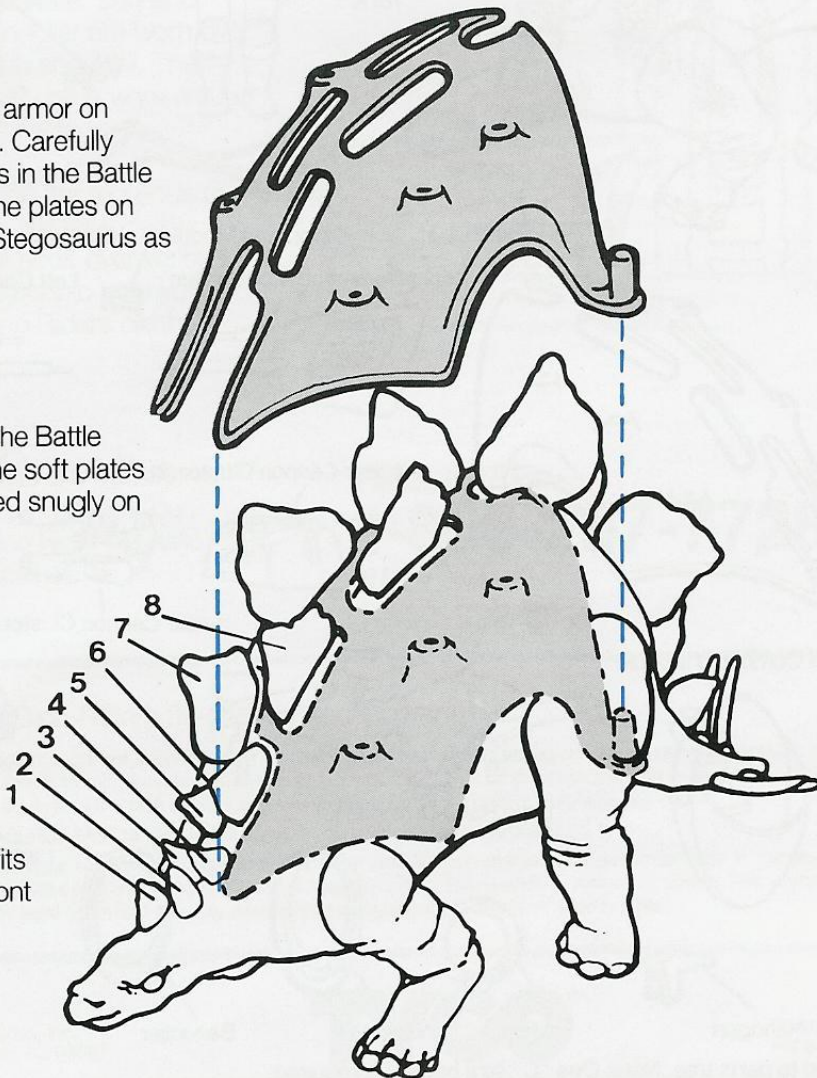

Now get Stegos battle. Install Gun Module Guns and Cannon Clusters. Snap Cannon Cluster

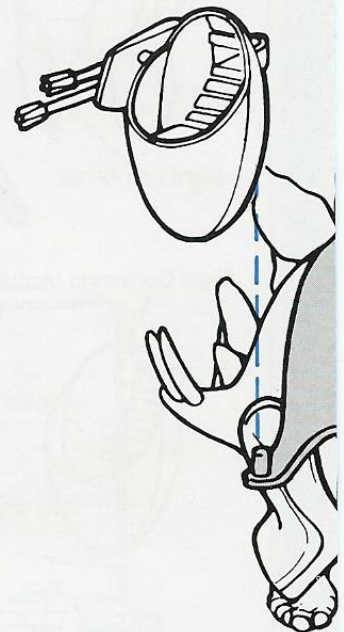

**4**

Mount battle armor on Stegosaurus. Carefully align the slots in the Battle Armor with the plates on the back of Stegosaurus as illustrated.

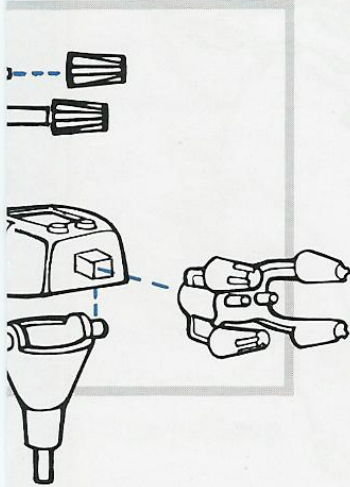

Gently push the Battle Armor over the soft plates until it is seated snugly on Stegosaurus.

Note: Plate No. 8 fits through the first front slot.

and Laser Cannon  
Swivels onto Laser  
s.

3

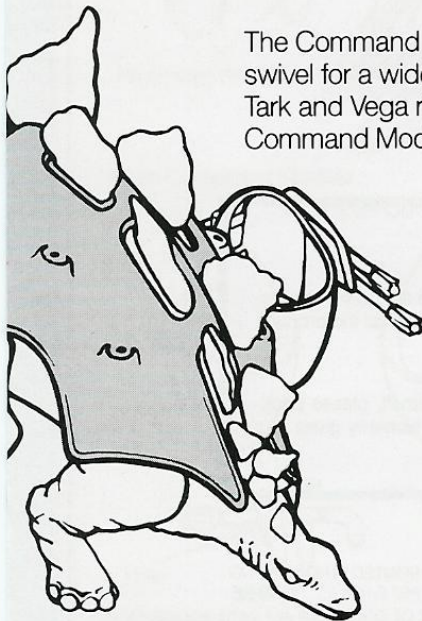

Assemble Command Module Gun to right Command Module as shown. Assemble the left Command Module the same way.

5

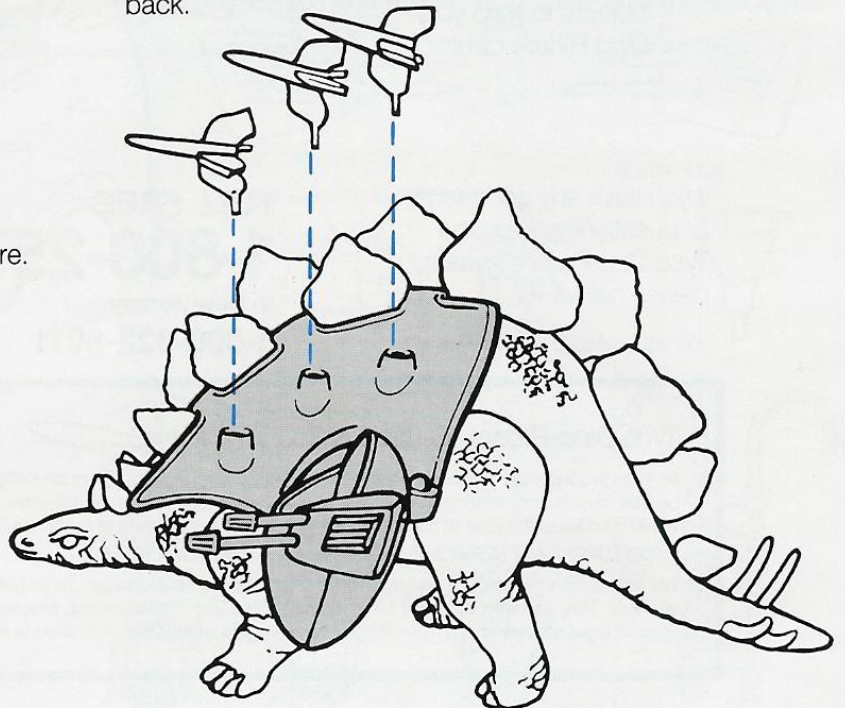

Snap the assembled Command Modules into place on each side. Note: guns are always on the *outside*.

The Command Modules swivel for a wide range of fire. Tark and Vega ride in each Command Module.

6

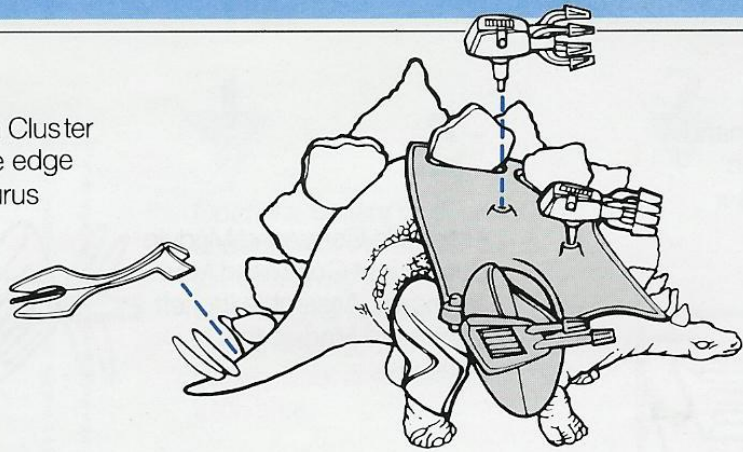

Mount the Missiles in the order illustrated: front, middle, and back.

7

Mount the Laser Cannon Cluster Guns, Leg Armor, double edge Tail Blades and Stegosaurus is ready.

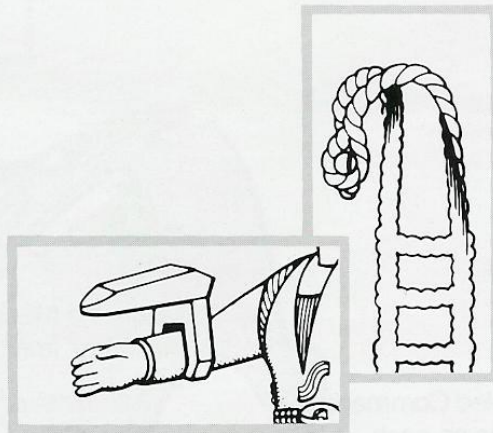

Turn on the switch (located on his underside) and he will charge off to face the Rulons.

8

The rifle and handgun clip on Tark and Vega's arm. The water skin and bandolier are worn over each shoulder. The AMP unit is worn around his neck.

Snap the top ends of the ladder together. It will hook over various objects to help your Dino-Riders climb.
